RBI-2656C

Description

The RBI-2656C 5GHz integrated router antenna is an advanced, cost effective wireless solution, designed for variety of outdoor applications, which includes high performance wireless router with Power over Ethernet (PoE) feature and high-gain directional antenna, all embedded in UV stabilized plastic enclosure.

The RBI-2656C now includes the powerful RB/411 board with Atheros AR7130 300MHz CPU and 32 MB RAM, perfect for simple CPE applications. You can use the RBI-2656C as a subscriber unit in point-to-multipoint networks. Also, pair of those can be used for 5GHz Backbones (Point-to-Point links).

The RBI-2656C is very easy to install thanks to power and data supply over a single Category 5 ethernet cable. This allows great flexibility of the package positioning, decreases installation costs and significantly reduces cabling and outlet requirements especially in hard-to-reach places.

Package includes:

- Mikrotik RouterBOARD 411 with Atheros AR7130 300MHz CPU, 32 MB RAM, One LAN Port
- MikroTik RouterOS with Level3 License
- Mikrotik R52 802.11a+b+g 54 Mbps miniPCI Wireless Card
- Vesuvius Streamline 5.150-5.850 GHz, 26 dBi Integrated Flat Panel Antenna
- 18V Power Supply Unit with PoE injector (PoE over Datalines not Supported)
